SUPPLEMENT TO
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT, 50 U.S.C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. PRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1 1. The State-owned Rock Gepgyar machine factory produces the following:

- 25X1
- a. Steam engines of all types
 - b. Boilers of all dimensions
 - c. Automatic firing equipment
 - d. Superheaters, air-heaters and water feed apparatus
 - e. Rust borers
 - f. Road building apparatus, steamrollers
 - g. High speed frame saws
 - h. Sugar manufacturing apparatus
 - i. Apparatus for dehydration of fruit
 - j. Ice-making apparatus and slaughterhouse equipment
 - k. Hydraulic presses, winepresses, bale presses
 - l. All iron castings
 - m. Pipelines for all purposes and pressures
 - n. Cisterns of all dimensions
 - o. High pressure fittings

2. Raw material required for production comes from the Soviet Union in the form of pig-iron, which is distributed by NIK and the Ministry of Supply. A certain amount of scrap iron and steel is produced locally. Processing is done in the furnaces in Ozd and Diosgyor. This is a great disadvantage, because with the smelting of pig-iron of Soviet origin there is an enormous amount of waste or scrap, and Ozd and Diosgyor cannot handle the work, which results in very considerable delays in delivery.

3. The factory delivers finished and semi-finished products chiefly to the Soviet Union, and for the domestic use.

4. There are 1,100 - 1,200 workers at the factory.

5. From 1942-1944 the factory produced war materials, namely mines, shells and components for armor-piercing shells. At present there are still three truck loads of mines in the factory not assembled. The factory can reconvert to war production at any time. It has its own railway line, and can load on to or unload from tugs on the Danube.
